## Enterprise Implementation Kung Fu

---

**Tuesday, September 25, 11:00 - 12:30 PM**

[View the presentation slides](#)

Nathan Glass and Stephanie Kern of Texas A&M Health Science Center will be presenting their implementation of Cascade server. They have spent several months tweaking their implementation and feel that some of the things they learned are worth sharing. They will talk about the organization of the backend, the configuration of the templates, and how they've implemented JavaScript libraries and other tools. They will also discuss different strategies for obtaining buy-in for the CMS from otherwise unwilling end users.

### About the Speakers:

Nathan Glass received his B.S. in Computer Science from Baylor University in May of 2004. While at Baylor, he was responsible for a web registration system, as well as maintaining servers and workstations. He has also worked as a web programmer, and has worked on a video processing/distribution system in use by the US military.

Nathan's areas of expertise include Linux, TCP/IP networking, and user interface/usability concerns, particularly with respect to web applications. One of his many responsibilities within the Office of Information Technology is assisting with maintenance the web systems.

Stephanie Lindan Kern graduated from Texas A&M University with a BBA in Marketing with a certificate in international business. Before joining the Texas A&M Health Science Center in 2005 Stephanie worked oversees for an international biotech firm and locally for Texas A&M University. Stephanie has been the webmaster for the two largest sites within the HSC and spearheaded the HSC's transition in to the HannonHill CMS.
