## Workflows - From beginning to end

---

**Monday, September 24, 1:30 - 3:00 PM**

[View session handouts](#)

Workflows can be a little challenging at first, but we'll go step-by-step on how to implement them. To give a better understanding of workflows in Cascade Server, we'll discuss:

- The purpose and importance of workflows
- Different types of workflows
- A workflow's structure
  - Steps, Actions, and Triggers
- Creating a workflow
  - By the Workflow Builder
  - By XML
- Assigning workflows
  - To Asset Factories
  - To Folders
- Testing a workflow

### About the Speaker:

Syl Turner is a Sales Engineer and Technical Trainer at Hannon Hill. His responsibilities are helping the sales team with any technical help they might need, and also training clients new to Cascade Server.

Originally from Houston, Texas, Syl graduated from Southern Polytechnic State University with a bachelor of science in computer science. He started doing web development over 10 years ago but his professional web development started with freelance and contract work for various companies in the Atlanta area.
