Makers of the Award-Winning Cascade Server content management software

A New HannonHill.com

By

Monday, April 2nd, 2007 at 1:00pm

If you're reading this you've probably already noticed the new hannonhill.com design. I think you'll agree that it's a pretty drastic change, but it's a change that we think was long overdue.

We're really proud of what Cascade Server is able to do, but the old site didn't showcase it well. We spend a lot of time bragging about what our clients have been able to accomplish on their websites using our CMS, but now it's time for us to brag a little about ourselves!

Like the old design, the new hannonhill.com is CSS based and fully W3C compliant. We offer RSS feeds of our blog and press releases, and multiple formats for each page. We've also added blog comments, an enhanced search function, and have simplified the information architecture to help you find what you're looking for faster. Best of all, it's all done using Cascade Server. So if there's an element that piques your interest, get in touch! We'd love to show you how we did it.
