Makers of the Award-Winning Cascade Server content management software

New Flash Demos Now on CMS Tube

By Elizabeth Starkey

Monday, April 2nd, 2007 at 1:00pm

If you're a regular visitor to our rich media micro site, [CMS Tube](#), you may have noticed that a number of new Flash-based [product demos](#) of Cascade Server have been recently added. We created these demos to help new users become familiar with some of the elements that are often brand new when you start using a CMS. Each of these demos introduces a specific concept or term, making them a great supplement to the [Business](#) and [Technical Intros](#) that are already online.

New Flash demos include:

[Assets in Cascade Server](#) – Explains how each asset works together to create a fully functioning website.

[Roles in Cascade Server](#) – Explores the different types of Roles and their functions.

[Blocks in Cascade Server](#) – Shows you when and how to use each type of block available.

[What is an Asset Factory?](#) – Describes how Cascade Server makes creating new content easy.

[What is a Data Definition?](#) – Illustrates how Cascade Server provides customizable structured authoring.

[How Does Cascade Server Manage Metadata?](#) – Explains how Cascade Server uses Wired and Dynamic Metadata to advance your site

We'll be adding more Flash demos soon, so check back with [CMS Tube](#) for updates. We would also love to hear your ideas for new demos that would make it easier for you to adapt to Cascade Server and get the most out of using the CMS.
