Makers of the Award-Winning Cascade Server content management software

Newsletter for 2003, Vol. 09 - September

Features This Issue: Hannon Hill Events in September Cascade Server Workflow Overhaul New Hannon Hill Partners Technical Tip Hannon Hill Events in September Hannon Hill's president, David Cummings, will be speaking at two events in September in California. Silicon Valley Web Guild September 10 at 7pm - San Jose, CA - Content Management in the Enterprise and Small Business David will be moderating a panel discussion on content management. Silicon Events Small Business Conference September 11 - Oakland, CA - Content Management for Small Business David will be giving a presentation on content management software for small businesses. Cascade Server Workflow Overhaul The Cascade Server workflow engine and visual workflow builder are being completely overhauled. Workflows can be attached to asset factories allowing the creation of specific assets with a pre-built workflow. This will help further extend the functionality and benefits of Cascade Server within the enterprise. Look for the updated workflow engine and workflow builder due out at the end of the September. New Hannon Hill Partners Hannon Hill would like to welcome the following partners to the Hannon Hill family: Sullivan Wolf Design - <http://www.northofthenotches.com/> Clifton Design Group - <http://www.clifton.com/> Technology Tip In Cascade Server, targets represent publishing paths. For example, a printer friendly version of a web page would be available at <http://www.mycompany.com/en/html/printer/>. The "en/html/printer" portion of the URL is controlled via the target. Each page in Cascade Server has one or more configurations each with a single template belonging to a single target. Thus, the template for the page configuration determines the publishing target. Using targets is very powerful for multi-format online publishing. About Hannon Hill Corporation Based in Atlanta, Georgia, Hannon Hill Corporation develops award-winning content management software for enterprises of all sizes. Hannon Hill is committed to building software that gives publishers strict control over their digital assets, while providing business users an easy, yet powerful method to manage content online.
