New HannonHill.com

If you haven't already noticed the new hannonhill.com design, take a look. Like the old design, the new hannonhill.com is CSS based and fully W3C complaint. We offer RSS feeds of our blog and press releases, and multiple formats for each page. We've also added blog comments, an enhanced search function, and have simplified the information architecture to help you find what you're looking for faster. Best of all, it's all done using Cascade Server. So if there's an element that piques your interest, get in touch! We'd love to show you how we did it.

Cascade Server 2007 User's Conference Announced

Mark your Calendars for September 24-25 – the Cascade Server 2007 User's Conference is back! Last year was a great success, and this year is shaping up to be even better. In your feedback, one word kept coming up: "more"! In response, we're adding an extra day; and you can expect more user driven sessions, more interaction, and a more in-depth technical track.

The conference will again be held in Atlanta, Georgia – the high-tech capital of the South and Hannon Hill's home town. We hope to see lots of new faces, as well as everyone who visited us last year.
