### Cascade Server 5.1 Release

Hannon Hill was proud to announce the release of the latest version of its award-winning content management system, Cascade Server 5.1. In keeping with the theme of previous Cascade 5-series releases, Cascade Server 5.1 provides users with improved performance, flexibility, and speed to optimize the user experience. New features available in 5.1 that accomplish this goal of enhancing the user experience include Quick Links, a new Advanced tab, and a simplified Template Import Process. Quick Links delivers more convenient access to your most frequently-used features, while the new Advanced tab consolidates some of the less-frequently used ones. In addition, the Template Import Process has been automated so that every template submission is handled in the expected manner every time. All Cascade users are sure to benefit from the increased usability and functionality of Cascade Server 5.1.

### Cascade User Survey

At Hannon Hill, one of our goals is to constantly find ways to improve Cascade Server's overall user experience. Who better to consult about new features, improvements, and suggestions than you?

This year, we will be conducting quarterly client satisfaction surveys so that we can better understand your needs and wants in a CMS system. Throughout the year, we will be taking proactive steps to accommodate these needs and ultimately ensure that your experience with Cascade continuously improves. For those of you that have already responded to our survey, thank you! Your responses have been extremely helpful. For anyone who has not already had the chance, please [take our Client Satisfaction Survey](#). Your input is crucial in our efforts to better your Cascade experience.
