Makers of the Award-Winning Cascade Server content management software

Hannon Hill Releases Cascade Server Version 3.7

ATLANTA - OCTOBER 7, 2005 – Hannon Hill Corporation, a leading provider of enterprise web content management (WCM) solutions, today announced the release of Cascade Server version 3.7.

"We're really excited about the new features and benefits offered in version 3.7," says Collin VanDyck, Chief Technology Officer of Hannon Hill. "This version is all about the user: making processes easier and more intuitive, and automating functions that used to be manual."

While the look and feel of the software has stayed familiar, there have been significant improvements to current functions, as well as new features designed to improve the usability and efficiency of the product.

Version 3.7 also introduces plug-ins to Cascade Server, in particular, an image editing applet that allows users to edit the size, brightness, contrast, and rotation of images from within the CMS.

In addition to its new Image Editing Applet, Cascade Server now offers: - Enhanced global search and replace - New Review Date metadata field - Increased workflow options - Improved link manager - Additional data definition options

Cascade Server version 3.7 was made available to new and current clients on October 7, 2005.

About Hannon Hill Corporation
