Makers of the Award-Winning Cascade Server content management software

Hannon Hill Releases Cascade Server 4.0

ATLANTA – APRIL 5, 2006 – Hannon Hill Corporation, a leading provider of enterprise web content management (WCM) solutions, today announced the release of a major upgrade for their flagship product: Cascade Server version 4.0.

Cascade Server 4.0 is a "next-generation" release that marks a major turning point in the usability and functionality of the product. While maintaining the software's flexibility and advanced features, Hannon Hill's development and design team have given the product a softer, more user-friendly feel.

"This is one of the most exciting releases since our initial launch of Cascade Server," says David Klanac, Product Manager for Hannon Hill. "Our goal with this release was to really improve the complete user experience. We like to say that we've simplified the interface, but it's not just that – nothing's been taken away, in fact we've added features – but now Cascade Server is easier to use: tasks are more streamlined, and options are more intuitive."

Users will immediately notice changes: the new icons are clearer, and there's a new, more intuitive tab layout throughout the interface. Version 4.0 also features a fresh look for the dashboard, with added functionality. Now each user will have a personalized start page, easy access to the types of content they most frequently use, as well as a list of all content in need of review.

In addition to its new design and added dashboard features, Cascade Server now offers: - New site wizard - Consolidated Administration area - Default user group option - Expanded Manager role - External link checker - Additional reporting options - New WYSIWYG editor with more formatting options - Many more

About Hannon Hill Corporation

Hannon Hill Corporation makes web content management solutions that give people the freedom to manage their Internet, Intranet, Extranet and Portal content with ease. Our solution, Cascade Server, is ideal for mid-sized organizations including education, healthcare, technology and publishing. Designed for any network environment, Cascade Server is as easy as email and gives IT departments much needed deployment flexibility, a zero footprint client and implementation in under one month. Since 2001, Hannon Hill solutions have been trusted by organizations including Duke University, Carnegie Mellon University, St. Joseph's Hospital of Atlanta, Apple Computer, PGP Software, Reed College and SCOREGolf Magazine. For more information about our award-winning Cascade Server, go to www.hannonhill.com or contact us directly at 800-407-3540.
