## Hannon Hill Proudly Presents Cascade Server 5.1!

---

*Cascade Server 5.1 Delivers Improved Performance, Flexibility and Speed to Optimize User Experience.*

ATLANTA – January 18, 2008 – Hannon Hill is proud to release the latest version of its flagship CMS product, Cascade Server 5.1! New features and improvements have been added to simplify the user interface and enhance the user experience with Cascade. We listened to your feedback and suggestions and used them to help make Cascade 5.1 more intuitive and efficient than ever before. The new features aiding Cascade in accomplishing this goal of enhancing the user experience include Quick Links, a new Advanced tab, and a simplified Template Import Process. Quick Links delivers more convenient access to your most frequently-used features, while the new Advanced tab consolidates some of the less-frequently used ones. In addition, the Template Import Process has been automated so that every template submission is handled in the expected manner every time. Users are sure to benefit from the increased usability, functionality, and efficiency that these new features will provide.

These enhancements serve to streamline the user experience while providing the consistent performance you've come to expect from Cascade Server. Note: Cascade Server 5.1 runs a series of database updates for users upgrading from 4.x that could require up to several hours to complete depending on the size of your database. It is recommended that you perform this conversion during off-peak hours. Please account for this potential downtime when upgrading.

For information on how to purchase Cascade Server or upgrade an existing software license, organizations should contact Hannon Hill at 800.407.3540 or by email at [info@hannonhill.com](mailto:info@hannonhill.com).

### About Cascade Server

Cascade Server is a powerful web content management (WCM) solution that gives people the freedom to manage their Internet, Intranet, Extranet and Portal content with ease. Designed around XML and for any network environment, Cascade Server is accessible through any Internet-connected browser and is as easy as email. Unlike current WCM solutions, Cascade Server helps organizations maintain a higher quality, standards-compliant web site, while providing deployment flexibility, a zero footprint client and a fast implementation.

## About the Company

Hannon Hill creates web marketing solutions that give people and organizations the freedom to manage their Internet, Intranet, Extranet and Portal content with ease. Our primary software solution, Cascade Server, is ideal for organizations in industries such education, healthcare, technology, government, and publishing. Designed for any network environment, Cascade Server is as easy as e-mail and gives IT departments much needed deployment flexibility, a zero-footprint client and fast implementation. Since 2001, Hannon Hill solutions have been utilized and trusted by organizations including Duke University, Carnegie Mellon University, MCG Health Systems, PGP Corporation, Reed College and SCOREGolf magazine. For more information about Hannon Hill and all of our products, please visit [www.HannonHill.com](http://www.HannonHill.com) or contact us directly at 800-407-3540.
