Makers of the Award-Winning Cascade Server content management software

Features

Cascade Server's flexible, open standards architecture provides many advanced features to aid in content management, collaboration, and site administration.

Creating & Editing

- [Browser-based for Mac and PC](#)
Access Cascade Server anywhere any time using a zero-footprint client. No client downloads or applets required.
- [Single-click Content Creation](#)
Business users can create new pages easily using Cascade Server's Asset Factories.
- [WYSIWYG Editing](#)
Just like a standard word-processor, Cascade Server's WYSIWYG allows users to manipulate the arrangement, size, and layout of their content.
- [Upload and Manage any File Type](#)
Cascade Server allows you to manage any file type, right within the same interface.
- [Multilingual Capable](#)
Cascade Server supports all major international languages and offers specialized workflows to facilitate human translation for multilingual sites.
- [Structured Authoring](#)
Cascade Server's Data Definitions allow for even quicker content creation using structured form fields for specialized pages.
- [Spell Checker](#)
Check your spelling as you edit.
- [Site Preview](#)
View your site before going live – right within the Cascade Server interface.

Site Flexibility

- [Multi-site Management](#)
Cascade Server's flexible architecture and licensing model allows unlimited Sites to be managed within the same interface.
- [Separation of Content and Design](#)
Let your content writers and layout designers focus on what they do best.
- [Content Reuse Across Sites](#)
Centrally manage common content and automatically propagate content changes throughout your site.
- [Custom Metadata](#)
Improve site flexibility and automatically generate navigation with custom metadata.
- [Multiple Format Conversion](#)

Edit single source content to generate HTML, PDF, and XML automatically.
Repurpose content for different devices including PCs (web browsers), PDAs, cell phones, and printed materials.

- [Automatic Navigation](#) [\(Article\)](#)
Dynamic generation of bread crumbs, site maps, and context sensitive navigation menus based on content.
- [Automatic Link Checking](#)
Checks for broken links when creating, editing, or publishing content.

Collaboration, Approvals, & Security

- [Personalized Dashboard](#)
Provide each user with a personalized start page.
- [Flexible Users and Groups](#)
Give everyone the right amount of access by assigning customized permissions, roles, and options to individual users and groups.
- [Content Access Rights](#)
Select read and write access rights at the folder or asset level and assign permissions at the page or region level.
- [Check-in/Check-out Content](#)
Aid collaboration by preventing multiple edits to the same content.
- [Workflow Management](#) [\(Article\)](#)
Workflows manage everything from content creation to archival.
- [Notifications & Messaging](#)
Receive system notifications and send messages to other users with Cascade Server messaging tools.
- [Audits & Reporting](#)
Cascade Server offers a comprehensive audit trail for system administrators viewable by user, group, or assets as well as the ability to generate summary reports on system data.
- [Version Control](#)
Cascade Server automatically saves versions of content, so nothing is ever lost.
- [Enterprise Search](#)
Search through all pages and files by metadata or date range for specific words and phrases within the system.

Publishing

- [Scheduled and Manual Publishing](#)
Custom publishing options offer full control and ease of use.
- [Automatic Archiving](#)
Cascade Server lets you set expiration dates for time sensitive content.
- [Multiple Server Publishing](#)
With Cascade Server, there is no limit to the number of publishing locations.
- [Search Engine Friendly URLs](#) [\(Article\)](#)
Improve Search Engine Optimization (SEO) and Search Engine Marketing (SEM) efforts with keyword-packed, relevant, human-readable URLs.

Standards Support

- [LDAP Integration](#)
Cascade Server integrates with LDAP servers for authentication and user lists.
- [RSS Feed Generation \(Article\)](#)
Use XML syndication to create RSS feeds for your site.
- [Accessibility Compliance \(Article\)](#)
Automatic checkers ensure that you are in compliance with 508 standards for accessibility.
- [Tidy HTML/XML](#)
Using Tidy HTML/XML and automatic checkers allows users to keep their pages lightweight and standards compliant
- [Web Services](#)
Cascade Server offers a SOAP-based API for Web Services integration.
